

Single Jersey Circular Knitting Machine

Designed with the central adjustment system to adjust fabrics in different levels of density easily and conveniently, normally equipped with different gauges of cylinders which is easy to alter and can meet the varying requirements in the knitting market.

- **Most Popular model.** It can knit various kinds of single jersey fabric. Easy to inter-change with replacing few parts
- **Application Area:** Vest, T-shirt, Polo shirts, functional sportswear and underwear or seamless clothes (small size).

Main Features:

Adopting the 4 track cams seal design and equipped with knit cams, tuck cams and miss cams. High precision central raising and falling system can adjust the fabric weight conveniently and quickly. The special design of the feeding yarn carrier makes the option of Lycra more proficient. Featuring an ergonomic design, the additional middle feeding yarn transfer ring makes it easy for personnel to monitor and carry yarn, without the machine touching the operator's body; at the same time, the yarn carrying system is freer and steadier, satisfying the demand of machine operating and knitting at high speeds.

- **Flexible for knitting varying fabrics and Multi-functional models.**

By replacing the heart parts, it can easily converted into 3 thread fleece and terry machine and other machines.

Technical Data

| Model | Cylinder Diameter | Machine Gauges | No. of Feeders | Speed |
|-------|-------------------|----------------|----------------|-----------|
| SJ3 | 16"-44" | 16-36G | 3F/Inch | 20-45 RPM |
| SJ4 | 26"-44" | 18-30G | 4F/Inch | 20-30 RPM |
| SJ6 | 26"-44" | 20-30G | 6F/Inch | 20-25 RPM |
